**RESULTS OF OPERATIONS (RO) MODELING PROCEDURES**

Upon request of the Energy Division Director or his designee(s), SCE and/or the Office of Ratepayer Advocates (ORA) will provide all necessary assistance to the Energy Division in running the RO model used by SCE in Phase 1 of A.02-05-004 et al. to produce tables required for the proposed decision, any alternate decision, and the final Commission decision. The following requirements shall govern the modeling process:

Model run(s) shall be performed at the Commission offices under the supervision, oversight, and control of the Energy Division Director or his designee(s).

Model run(s) shall be performed using computer hardware, software, and media installed or placed in the Commission Offices. All such hardware, software, and media, and all related notes, worksheets, workpapers and computer output, shall remain in the custody of the Energy Division Director or his designee(s), and shall not be removed from the Commission Offices until 30 days after issuance of a final Commission decision which incorporates the model run, provided, however, that to the extent needed for issuance of the decision and issuance of supporting workpapers, media, notes, worksheets, and computer output may be released on and after the date of issuance of the proposed or alternate decision.

The computer equipment used to perform model runs shall be "stand-alone," i.e., it shall not be connected with any other computer, computer system, or any other device which would allow communication of information in the model, model run, or inputs or outputs.

Before obtaining access to any information contained in or pertaining to the draft proposed decision or any alternate decision

(prior to the issuance of a final decision adopting SCE's Test Year 2003 revenue requirement in Phase 1 of A.02-05-004, et al.),

each employee, agent, or representative of SCE and/or representative of ORA involved in the modeling shall sign a certificate assuring compliance with the protective order attached hereto.

The Energy Division Director or his designee(s), shall determine that each SCE employee, agent, or representative and representative of ORA who receives access to information about the contents of the proposed decision and any alternate decision has first signed a certificate of compliance with the protective order.

As soon as practicable after the date of issuance of the proposed decision and, if applicable, alternate decision, and no later than seven days after the date of such issuance, Energy Division, and if necessary with the assistance of employees, agents, or representatives from SCE and/or representatives of ORA having signed a certificate of compliance with the protective order, shall serve workpapers associated with this modeling upon each party of record making prior written request for them. Workpapers associated with the model run supporting the ALJ's proposed decision shall be designated Late-Filed Exhibit 405. If it is necessary for Energy Division to prepare and issue an alternative set of workpapers in connection with one or more alternate decisions, Late-Filed Exhibits 406-410 are reserved for this purpose. Workpapers may be served in electronic form. To the extent that Energy Division believes that the workpapers would contain confidential information, it will consult with SCE and, if necessary, SCE may file a motion for a protective order to address or limit the parties or individuals who may receive the workpapers. The protective order attached hereto is only designed to prevent disclosure of confidential information prior to the issuance of the final decision adopting SCE's Test Year 2003 revenue requirement in Phase 1 of A.02-05-004 et al.
